Poly U Library: application for library card

Dear Poly U Library,

I am the founder of General Intelligence Research Group, a company focusing on R&D of artificial intelligence technologies.

I have previously worked with:

- Dr Ben Goertzel (currently in Poly U Design School)
- Dr 劉文印 (currently in City U department of computer science)

in the AI field.

I created the open-source project Genifer:

- <https://code.google.com/p/genifer/>
- <https://github.com/Cybernetic1/genifer5-c>

One of my published journal paper is:

- *Fuzzy-Probabilistic Logic for Common Sense*. **AGI 2012**: 372-379

I have written a book on artificial general intelligence, published online:

- https://drive.google.com/file/d/0Bx3_S9SExak-TUc2aFVGZEK3QzQ

I have also published numerous educational videos (related to artificial intelligence) on YouTube, such as:

- (P = NP problem) <https://www.youtube.com/watch?v=9MwGPrQ8yKg>
- (Galois theory) <https://www.youtube.com/watch?v=PO3MIDJjWrE>
- (Neural networks) <https://www.youtube.com/watch?v=Ow7Hc-xswEM>
- (Entropy) <https://www.youtube.com/watch?v=fAM2u1KadNI>

My research could result in commercial applications such as: machine translation, question answering, and may have profound implications for future technologies. I hope my company may one day benefit the Hong-Kong and global economy.

Yours sincerely,
Yan King Yin
